PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science and Engineering (AI & Data Science) student with hands-on experience in data analysis, data visualization, SQL, Python, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis (EDA), dashboard development, KPI analysis, and extracting actionable insights from datasets. Developed a Netflix Data Analysis dashboard using Power BI and currently strengthening Python, SQL, Excel, Power BI, and statistical analysis skills for Data Analyst roles.

TECHNICAL SKILLS

Programming: Python, SQL

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Statistical Analysis

Data Visualization: Power BI, Matplotlib, Seaborn

Business Intelligence: Power Query, DAX, Data Modeling, KPI Analysis, Dashboard Development

Database: MySQL

Microsoft Excel: Pivot Tables, Pivot Charts, XLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS, Conditional Formatting, What-If Analysis

Analytics: Trend Analysis, Sales Analysis, Customer Segmentation, Churn Analysis

Tools: Git, GitHub, VS Code

PROJECTS

Netflix Data Analysis Dashboard

Tools: Power BI, Power Query, DAX, Excel

- Analyzed Netflix content data to identify trends across movies, TV shows, genres, ratings, countries, and release years.
- Cleaned and transformed raw data using Power Query for dashboard development.
- Developed an interactive Power BI dashboard using KPI cards, slicers, charts, and filters.
- Created analytical measures using DAX to evaluate content distribution and year-wise trends.

- Used data visualization techniques to identify patterns and present actionable insights.

Smart Banking System

Tools: Java, Spring Boot, MySQL, REST APIs, Spring Security, JWT

- Developed a backend banking application using Java and Spring Boot.
- Implemented customer and bank account management using CRUD operations.
- Designed REST APIs for managing banking-related data.
- Used MySQL for database management and data persistence.
- Implemented authentication and authorization using Spring Security and JWT.
- Applied exception handling and validation for reliable API operations.

E-Commerce Sales & Customer Analytics

Tools: Python, Pandas, NumPy, SQL, Power BI

Status: Currently Building

- Cleaning and preprocessing transactional sales data using Python and Pandas.
- Performing exploratory data analysis to identify sales, customer, product, and regional trends.
- Applying SQL queries using JOINs, aggregations, CASE statements, CTEs, and window functions.
- Developing an interactive Power BI dashboard to analyze revenue, orders, average order value, and customer performance.
- Identifying high-performing products and customer segments through data analysis.

EDUCATION

Bachelor of Technology — Computer Science and Engineering (AI & Data Science)

Shree Siddheshwar Women's College of Engineering, Solapur

Affiliated to DBATU

Expected Graduation: 2027

TRAINING

Gyan Tirth Nandi Foundation — Technical Training

- Completed college-arranged technical training program.
- Gained exposure to technical concepts and professional development.

CERTIFICATIONS

- Data Analyst using Python Certification — NPTEL

ADDITIONAL INFORMATION

- **Career Interest:** Data Analytics, Business Intelligence, Data Visualization
- **Availability:** Fresher / Final-Year Student
- **Languages:** English, Hindi, Marathi
